PROFESSIONAL
STUDIO MICROPHONE
MMICPRO

The MMICPRO microphone is designed to elevate the quality of your audio recordings.

Its condenser capsule with cardioid polar pattern enhances sound pickup from the front side of the microphone to reduce room sound and other extraneous noises.

MMICPRO is powered by your device's USB port, there are no drivers to install which allows you to get started by just plugging in the microphone with Windows and Mac.

Features a built-in shock mount, pop filter and windscreen to isolate the microphone from undesired rumbles, wind and pop noises.

PACKAGE CONTENT

1 Condenser microphone **2** Shock-mount **3** Boom arm

4 Pop filter **5** Windscreen **6** USB cable

SETTING UP MMICPRO

1. Attach the boom arm clamp to the desk then install the boom arm.
2. Install the shock-mount to the boom arm screw.
3. Install the microphone into the shock-mount.
4. Marsgaming logo has to point to the audio source, use the shock-mount lever to adjust the tilt angle.
5. Place the microphone at 15-40 cm towards the sound source.
6. Connect the USB connector to the device and select MMICPRO as the audio input device.

Attention: Use the joint levers to loosen the boom arm and shock mount before adjusting their position.

DO   **DON'T**

MMICPRO will work with whatever software you use to stream, record or voice call. Simply plug the mic into your PC or Mac and select MMICPRO as your input recording device within your selected software. No drivers are required to take full advantage of all microphone features.

WINDOWS SETUP

1. Connect the microphone to your PC using the USB cable provided
2. Go to start menu and select Control Panel
3. From Control Panel select Hardware and Sound then select Sound
4. On recording tab select MMICPRO from the device list
5. Microphone gain can be adjusted on properties > levels

MAC SETUP

1. Connect the microphone to your PC using the USB cable provided
2. Go to System Preferences
3. From System Preferences select Sound
4. On Input tab select MMICPRO from the device list
5. Microphone gain can be adjusted on input tab

TROUBLESHOOTING

My microphone doesn't seem to be working:
Make sure that your USB cable is connected correctly and MMICX is selected as the input device.
If problem persists, connect the microphone to a different USB from your computer then restart.

My audio recording is not loud enough:
Increase microphone gain levels, place the microphone closer and make sure that Marsgaming logo is pointing to the audio source.
